The Only Shoe That Proves The Regal proves in the parts which you can see and in the hidden parts which you can't see.

It proves what it is made of before you pay your money and it proves you weren't mistaken after you give it long, hard use. The famous Regal buzz-saw has been used in the window of every Regal store, and it is busy all the time in some one of the Regal stores—cutting up shoes of every make, including Regals, and proving what they are made of. The Regal "Window of the Sole" proves to you before you try on the shoe that the sole is honest, old-fashioned, everlasting oak-tanned stock. Every other shoe has the fibre of the sole completely concealed by black finish or chemical stain. The "Window of the Sole" is a removable seal on the bottom of every shoe. Next time you try on a Regal, turn up the "window" and see the unstained natural color and close-set fibre of solid live oakbark-tanned leather. That's what the label's therefor.

We want you to know that the shoes you get in a Regal store are in every way as good as you can buy anywhere else for double the Regal price; and when you have started wearing Regal shoes we want them to wear so well that no others will ever suit you again. Because it's the regular customers that keep the 97 Regal stores busy. It's the new but regular customers that make it necessary for us to open new stores all the while.
